

The November ECAM Lunch & Learn, held on November 2 at the Holiday Inn Express, provided attendees with a valuable mix of networking opportunities and informative presentations. The day began with attendees enjoying coffee and engaging with an exhibit booth sponsored by Wesco.

The first presentation was delivered by Adam Marcynuk and focused on Manitoba Hydro's 2023 Integrated Resource Plan. This plan is the result of a two-year process that aimed to comprehend the factors driving changes in the Manitoba energy landscape. Attendees learned about the implications of these changes on the supply and delivery of electricity and natural gas in Manitoba.

The second presentation was delivered by Kyle Molotkin, the CEO of Informanix Technology Group, and it delved into Real World Ransomware Attacks. Kyle provided invaluable insights into various aspects of ransomware attacks, including the methods attackers use to infiltrate systems, strategies for responding to such attacks, and the real-world experiences.

This event was the second in a series of four Lunch & Learns, promising ongoing educational and networking value for all ECAM members.
